Swallowing in Neurodegenerative Disease

March 18, 2016—Room 147 Communication Arts & Sciences

John Rosenbek, Ph.D., CCC-SLP

Dr. Rosenbek is a Professor Emeritus in the Department of Speech, Language, and Hearing Sciences at the University of Florida and is an adjunct professor at Michigan State University.

He is a Fellow in the American Speech-Language-Hearing Association and has received honors in the Kleffner Career Clinic Award, the Kwana Lifetime Achievement in Publications, and the Honors of the Academy of Neurogenic Communication Disorders and Sciences.

Dr. Rosenbek has retired from the University of Florida and is still practicing in the field of Speech Language and Hearing Sciences. He recently completed his 45th year of practice, and is currently a clinical consultant. He also serves on a variety of Advisory Boards, and is a continuing education provider in the United States and abroad.

His current research focuses on early identification of disease based on speech and language performance with his colleagues.

---

Learning Objectives

- List the major types of neurodegenerative diseases
- Make predictions with reasonable levels of confidence about the timing and severity of dysphagia
- Create a videofluoroscopic swallowing examination protocol appropriate to a variety of neurodegenerative diseases
- Write a treatment plan for a variety of neurodegenerative diseases

---

Disclosures:

Nonfinancial—Presenter reports no apparent nonfinancial disclosures
Financial—Presenter reports no apparent financial disclosures
